DEVELOPER FIX SHEET · SAMPLE

# Fix plan: Sample Construction Co.

Run `20261104T051725Z` of https://www.sample-construction.example, generated 2026-11-04 by Audsey.

Accessibility index 65.4. 27 errors and 10 contrast errors to fix, in priority order.

116 alerts (1255 elements) need review and are not listed here.

## How to use this plan

- Work top to bottom: the order weighs severity, how many pages an issue reaches and whether it sits in a key journey.
- Fix at the source listed for each issue (an Elementor template or widget, theme file or plugin setting), not page by page; one change usually clears every instance.
- Selectors and edit links point at the scanned copy; map them to the live site when deploying.
- When the fixes are in, re-scan, then run the before/after report against the baseline.

**Problem**

The Recent Projects carousel advances every 3 seconds and the Testimonials carousel every 5 seconds, both looping without end. Neither has a pause button. The testimonials pause on mouse hover, which doesn't help keyboard, touch or screen reader users.

**Steps to reproduce**

1. Open the home page.
2. Scroll to Recent Projects and wait: the slides change every 3 seconds.
3. Look for a pause or stop control near either carousel: there is none.

**Fix**

Turn autoplay off for both carousels (simplest), or add a visible Pause button that stops them and also stop autoplay when anything inside receives keyboard focus.

## 28. Headings don’t describe the page structure

- **Type:** Error · **Severity:** moderate · **Effort:** S · **Fingerprint:** `17e53dfb4d27351a`
- **WCAG:** 1.3.1 Info and Relationships (A), 2.4.6 Headings and Labels (AA)
- **Where:** Home template; pages `/` at desktop

**Source in WordPress**

- Site-wide (template or theme level)

**Problem**

The footer form heading "Contact Us" is an h1 on every page, so most pages' only h1 is in the footer. On the home page lists of client names ("Restaurant Brand A Restaurant Brand B Restaurant Brand C Bakery Brand D") are h2 headings, and carousel copies repeat each project name as an h2 three times. The project and category templates have an empty h2 and skip from h2 to h4; the About page skips from h2 to h5.

**Steps to reproduce**

1. Open the home page and list the headings (screen reader heading list or a browser extension that outlines them).
2. Note "Contact Us" as an h1 in the footer and client-name lists as h2s.
3. Repeat on About, Portfolio and Under Construction: the only h1 besides "Contact Us" is missing or not the page title.

**Fix**

Give each page one h1 that names the page, make the footer "Contact Us" an h2, change client-name lists to paragraphs, remove the empty heading, and keep heading levels in order.

**Confirm the fix**

- Repeat the steps above on / and confirm the problem is gone.
- Helper: `audsey a11y manual tree --site sample --review <reviewId> --page /`
- Then mark M004 as fixed in the next manual review (verification.status "fixed").

## 29. No way to skip past the header to the main content

- **Type:** Error · **Severity:** moderate · **Effort:** S · **Fingerprint:** `73007a1675dbbd7f`
- **WCAG:** 2.4.1 Bypass Blocks (A)
- **Where:** Home template; pages `/` at desktop

**Source in WordPress**

- Site-wide (template or theme level)

**Problem**

There is no skip link, and 7 of the 9 pages in scope have no main landmark (only the project template has one).

**Steps to reproduce**

1. Open any page and press Tab: the first stop is the phone number in the header.
2. Count stops until the page content: 9 on desktop.
3. Check landmarks with a screen reader or the accessibility tree: no main region.

**Fix**

Wrap each page's content in a <main id="content"> element and add a "Skip to content" link as the first focusable item, visible when focused.

**Confirm the fix**

- Repeat the steps above on / and confirm the problem is gone.
- Helper: `audsey a11y manual tree --site sample --review <reviewId> --page /`

## 30. Contact form fields have no visible labels or required markers

- **Type:** Error · **Severity:** moderate · **Effort:** S · **Fingerprint:** `7dece15b0c97cc4f`

- Elementor wp-page #725, widget form.default (data-id 11af805d) — edit: https://www.sample-construction.example/wp-admin/post.php?post=725&action=elementor

**Problem**

The labels exist but are hidden (screen-reader only); the only visible label is placeholder text, which vanishes when typing and is low contrast. Name, email and phone are required, but nothing on screen says so until submission fails.

**Steps to reproduce**

1. Open the Contact page and go to the form.
2. Type into First Name and Your Email: the placeholder text disappears.
3. Look for any marker of required fields: there is none.

**Fix**

In the Elementor form settings, show the field labels above the fields and mark required fields (for example "First name (required)").

**Problem**

In the Recent Projects carousel, each visible slide (a div with tabindex="0") receives focus. They have no role, aren't links and do nothing when activated; the arrow buttons beside them have no accessible name (also found by the automated scan).

**Steps to reproduce**

1. Open the home page and tab to Recent Projects.
2. Focus lands on each slide in turn ("Restaurant Brand B Anytown, ST", "Retail Client E Anytown, ST" …); pressing Enter does nothing.

**Fix**

Remove tabindex from the slides (or make each slide a link to its project page), and give the arrow buttons names such as "Previous projects" and "Next projects".

**Instances** (1)

**Problem**

On Portfolio and Under Construction, each project gallery's previous/next arrows and slide dots ("1 of 7" ...) take focus but nothing visible changes. The galleries' slide panels also take focus without a name.

**Steps to reproduce**

1. Open the Portfolio page.
2. Press Tab past the main menu into the first gallery.
3. Watch the arrows and dots as they receive focus: none shows an outline or other change.

**Fix**

Add a clear focus style to the Happy Addons carousel controls, for example .ha-slick--carousel .slick-arrow:focus-visible, .ha-slick--carousel .slick-dots button:focus-visible { outline: 3px solid #14213D; outline-offset: 2px; }.

**Instances** (1)

- Elementor wp-page #725, widget form.default (data-id 11af805d) — edit: https://www.sample-construction.example/wp-admin/post.php?post=725&action=elementor

**Problem**

The First Name, Your Email and Phone Number fields have no autocomplete attribute.

**Steps to reproduce**

1. Open the Contact page.
2. Inspect the First Name, Your Email and Phone Number fields: no autocomplete attribute.

**Fix**

Add autocomplete="given-name", "email" and "tel" to the three fields (Elementor Pro: Advanced tab of each field, or a small filter).

**Instances** (1)

| Page | Viewport | State | Selector | Source |
|---|---|---|---|---|
| /contact/ | desktop | | #form-field-name, #form-field-email, #form-field-field_6c180a9 | Elementor #725 / 11af805d |

Example element:

```
<input type="text" name="form_fields[name]" id="form-field-name" placeholder="  First Name" required>
```

**Confirm the fix**

- Repeat the steps above on /contact/ and confirm the problem is gone.

## 35. The main menu is the only way to find pages

- **Type:** Error · **Severity:** minor · **Effort:** S · **Fingerprint:** `7c67d289e16b8edd`
- **WCAG:** 2.4.5 Multiple Ways (AA)
- **Where:** Home template; pages `/` at desktop

**Source in WordPress**

- Site-wide (template or theme level)

**Problem**

There is no search, site map page or footer menu (the footer has only the logo and social links). Individual project pages aren't in the menu.

**Steps to reproduce**

1. Look for search, a site map link or a footer menu on any page: there is none.
2. Try to reach a project page other than through Portfolio: there is no other route.

**Fix**

Add a footer menu that includes a link to an HTML site map page listing all pages and projects (or add site search).

**Confirm the fix**

- Repeat the steps above on / and confirm the problem is gone.
- Then mark M005 as fixed in the next manual review (verification.status "fixed").

## 36. A hidden breadcrumb link takes keyboard focus

- **Type:** Error · **Severity:** moderate · **Effort:** S · **Fingerprint:** `1af236c7af6f3fab`
- **WCAG:** 2.4.11 Focus Not Obscured (Minimum) (AA)
- **Where:** Project category template; pages `/category/current-projects-p/` at desktop

**Source in WordPress**

- theme sample-theme (archive category) · inside #content-wrap

**Problem**

On the project and category template a breadcrumb ("Home" …) sits behind the dark menu bar. Its links still take focus, but they are completely covered.

**Steps to reproduce**

1. Open a category page, e.g. /category/current-projects-p/.
2. Tab through the header and main menu.
3. The next stop, a breadcrumb "Home" link, is focused but hidden behind the menu bar.

**Fix**

Move the breadcrumb below the menu bar (or remove it if it isn't wanted) so it is visible when focused.

**Instances** (1)

| Page | Viewport | State | Selector | Source |
|---|---|---|---|---|
| `/category/current-projects-p/` | desktop | | `body > div:nth-of-type(1) > div:nth-of-type(1) > div:nth-of-type(1) > ul > li:nth-of-type(1) > a` | theme sample-theme #content-wrap |

**Confirm the fix**

- Repeat the steps above on /category/current-projects-p/ and confirm the problem is gone.
- Helper: `audsey a11y manual keyboard --site sample --review <reviewId> --page /category/current-projects-p/`
- Then mark M010 as fixed in the next manual review (verification.status "fixed").

## 37. The sidebar form jumps ahead of the page in tab order

- **Type:** Error · **Severity:** moderate · **Effort:** S · **Fingerprint:** `c5730381a6a7058d`
- **WCAG:** 2.4.3 Focus Order (A)
- **Where:** Project category template; pages `/category/current-projects-p/` at desktop

**Source in WordPress**

- Gravity Forms · theme sample-theme (archive category) · inside #input_2_1_3

**Problem**

The Gravity Forms contact form in the sidebar of the project and category template has tabindex="50" on its fields, so they come before the header, menu and content in tab order. Focus then jumps back up to the header.

**Steps to reproduce**

1. Open a project or category page, e.g. /projects/sample-office-building/.
2. Press Tab once: focus goes to "Client Name" in the form near the bottom of the page.
3. Keep tabbing: after the form, focus jumps back up to the top of the page.

**Fix**

Remove the tabindex from the form: turn off the tabindex in the theme's Gravity Forms embed (tabindex="50" in the shortcode or gform_tabindex filter), or add add_filter( 'gform_tabindex', '__return_false' );

**Instances** (1)

| Page | Viewport | State | Selector | Source |
|---|---|---|---|---|
| /category/current-projects-p/ | desktop | | #gform_2 input[tabindex] | Gravity Forms |

Example element:

```
<input type="text" name="input_1.3" id="input_2_1_3" tabindex="50" placeholder="Client Name">
```

**Confirm the fix**

- Repeat the steps above on /category/current-projects-p/ and confirm the problem is gone.
- Helper: `audsey a11y manual keyboard --site sample --review <reviewId> --page /category/current-projects-p/`
